DRASTIC Application – Instruction

Plugin requirements

Step 1. If the user does not have the QGIS software installed, please install the version (QGIS NoDebo 2.12.1) through QGIS official site (www.qgis.org) as OSGeo4W Network Installer (32 or 64 bits).

Step 2. Execute osgeo4w-setup as administrator and choose Advanced Install.

Step 3. Go to C:\OSGeo4w\apps\qgis\python\plugins or QGIS\apps\qgis\python\plugins and paste the DRASTIC plugin.

Step 4. In QGIS Bar menu, go to *Plugins/ Fetch Python Plugins*. Verify if DRASTIC plugin is available.

Step 5. In the same Bar menu, go to *Plugins/Manage Plugins* and selected the DRASTIC plugin in order to add the toolbar to the QGIS desktop.
